KSE | Foundation

May 2022

SVITLANA DENYSENKO
Director of KSE Foundation

During this month, KSE Foundation launched a series of programs that bring Ukraine to the spotlight of the international community.

We are proud to launch the MintForUkraine project. The largest collection of NFT art in history, consisting of 1 million AI generated pieces, has been created with American partners. The central theme of the collection is symbols of the Ukrainian spirit.

The next international project was realized together with Data And Aid Tech (D.A.T.A.) initiative. Volunteers involved in IT technologies provided their unique experience to build a network of Ukraine's friends abroad. We transferred the collected funds to buy first-aid kits. We want to thank D.A.T.A. for saving thousands of lives!

We continue our cooperation with authorities and SOEs. For instance, we signed a cooperation agreement with Ukrposhta. Our first joint project is to provide equipment for a computer class in the town of Borodianka.

Moreover, together with the Ministry of Health of Ukraine, we are working on the complete restoration of the Makariv outpatient clinic, which the Russians destroyed. Our goal is to raise UAH 20 mln in order to provide proper medical care for 16,000 local residents.

And, of course, we worked on the most important track for Ukrainian society nowadays - we supplied humanitarian aid to the Armed Forces of Ukraine soldiers fighting for our victory.

**The KSE team wants to thank everyone who joined the fundraiser.
Stronger together!**
