

February 2023

REPORT

SVITLANA DENYSENKO

Director of KSE Foundation

This was the year of a full-scale invasion, a year of unity, strength, and courage.

Throughout the year, the team of the Kyiv School of Economics Charitable Foundation helped to defend and rebuild Ukraine by supplying the defense forces, supporting liberated communities, and building safe and modern educational institutions.

We are assembling and delivering drones to our defenders, rebuilding destroyed hospitals, and constructing safe shelters. We support talented individuals and help them become even better.

Our 'Safe Education' project, which assists thousands of students across Ukraine in returning to their schools, continues. During this time, we have managed to equip reliable shelters in 19 educational institutions, and another 3 shelters will be ready very soon.

The 'Talents For Ukraine' initiative has already aided over 40 talented Ukrainians with grants to develop their own ideas and projects. With such incredible people we can look forward to the future of Ukraine.

The Makariv outpatient clinic will soon welcome its first visitors. Thanks to the support of philanthropists and friends of the Foundation, thousands of residents of the liberated communities can return to normal life.

The team of the Kyiv School of Economics Charitable Foundation is incredibly grateful to everyone who helped us make these projects a reality. Together, we can achieve the impossible and bring our collective victory even closer.
